**BIOLOGY (BI)**

**BI-101 Concepts of Biology**  
**LASC Categories:** LAB, NSP  
Unifying principles in biology; diversity and evolution of plant and animal life at cellular and organismic levels. Three lecture hours and a two-hour laboratory per week.  
Every year. 4 Credits

**BI-103 The Human Animal**  
**LASC Categories:** NSP  
A general survey of the structure and function of human body systems from the biochemical and cellular basis of life to evolution of the human body and the organization of organs and organ systems, including the biological basis of selected disease states.  
Every year. 3 Credits

**BI-104 The Human Animal Laboratory**  
**LASC Categories:** NSP, LAB  
**Prerequisites or Corequisites:** BI-103  
This course is the lab to accompany The Human Animal, a general survey of the structure and function of human body systems from the biochemical and cellular basis of life to evolution of the human body and the organization of organs and organ systems, including the biological basis of selected disease states.  
Every year. 1 Credit

**BI-111 Social Biology**  
**LASC Categories:** HBS, NSP  
This course considers the interface between current biological technologies and the social, cultural, legal, and moral postures of modern man.  
Every year. 3 Credits

**BI-112 Diseases and Mankind**  
**LASC Categories:** GP, NSP  
Diseases of ancient and modern man; the impact on history, religion, science, art and philosophy.  
Spring only and every year. 3 Credits

**BI-114 Plants and Human Affairs**  
**LASC Categories:** GP, NSP  
Man’s dependence upon plants and their influence on civilization and its art, religions, literature, folklore, medicine, and human behavior.  
Spring only and every 2-3 years. 3 Credits

**BI-116 Animal Biology**  
**LASC Categories:** LAB, NSP  
Survey of animal kingdom with emphasis on animal diversity, morphology, life histories, ecological evolutionary relationships. No credit for Biology major. Three lecture hours and two laboratory hours per week.  
Fall and Spring. 4 Credits

**BI-117 Humans and the Environment**  
**LASC Categories:** LAB, NSP  
A survey of Anthropologic environmental impacts and the underlying mechanisms involved. Three lecture hours and three laboratory hours per week.  
Other or on demand. 4 Credits

**BI-118 Dinosaurs**  
**LASC Categories:** NSP, LAB  
A survey of dinosaurs; their evolution, anatomy, diversity and impact on evolutionary biology. Discussions of the changing views of dinosaurs in the media and public consciousness. Three hours lecture and two hours lab.  
Every 2-3 years. 4 Credits

**BI-119 Biology of Sex**  
**LASC Categories:** NSP, TLC, WAC  
**Prerequisites:** Writing II  
A introduction to the natural history of sex, to answer the question of why does sex exist, and discuss topics of variation, sexual dimorphism, sexual selection, inter- and intra-sexual conflict, mating systems in plants and invertebrate animals. Will also focus on mating systems among vertebrate animals: monogamy, polygamy (including polygyny, polyandry, and polygynandry), sexual reproduction in mammals, and among primates. Will cover courtship behavior in sexual animals with emphasis in marine invertebrates, arthropods, and primates (including humans). Course will conclude with a discussion of the genetics of parent-offspring conflict in placental mammals. Other or on demand and every year. 3 Credits

**BI-120 Darwinian Revolution**  
**LASC Categories:** TLC, NSP  
An interdisciplinary perspective on the philosophical, religious, and social impacts of Darwin’s theory of evolution by the process of natural selection. [Formerly BI370.]  
Every 2-3 years. 3 Credits

**BI-125 Women in Science**  
**LASC Categories:** HBS, NSP, DAC  
Examines issues related to gender in science and technology. Includes historical and recent contributions to science made by women.  
Other or on demand and every 2-3 years. 3 Credits

**BI-130 Field Biology**  
**LASC Categories:** GP, NSP, LAB  
Study-Abroad Field Biology course for non-Biology majors. Course explores the intersection of human activities and environmental preservation, with a basic introduction to topics in organismal biology, biodiversity and biogeography.  
Spring only and every year. 4 Credits

**BI-140 Introduction to Organismic Biology**  
**LASC Categories:** LAB, NSP  
Evolution, ecology, anatomy, physiology and diversity of organisms. Three hours lecture and three hours lab each week. Intended for STEM Majors.  
Every year. 4 Credits

**BI-141 Intro to Cellular and Molecular Biology**  
**LASC Categories:** NSP, LAB  
**Prerequisites:** CH-120. CH-121 is a recommended course that can be completed concurrently or previously.  
Cellular and molecular concepts in biology. Emphasis on the structure and varied functions of the cell. Three lecture hours and three laboratory hours per week. Intended for STEM Majors.  
Every year. 4 Credits

**BI-161 Human Anatomy and Physiology I**  
**LASC Categories:** NLL  
Considers human cellular biology, tissues, integumentary, nervous, endocrine, skeletal, muscular systems. Three hours of lecture and a three-hour laboratory per week.  
Every year. 4 Credits
BI-162 Human Anatomy and Physiology II
LASC Categories: LAB, NSP
Prerequisites: BI-161.
Considers digestive, respiratory, cardiovascular, urinary, immune and lymphatic systems; water and electrolyte balance, reproduction and embryology. Three lecture hours and three laboratory hours per week. Spring only and every year. 4 Credits

BI-193 First Year Seminar Biology
LASC Categories: FYS
Introductory level course covering topics of special interest to first year students. Offered only as a First Year Seminar. Every year. 3 Credits

BI-199 Selected Topics: Biological Sciences
Each topic is a lecture and/or a laboratory course in a selected area of the biological sciences presented by a departmental instructor, Topics will be announced in advance. Every 2-3 years. 1-4 Credits

BI-200 Human Biology
LASC Categories: NLL
Prerequisites: BI-140 and BI-141 or PB-200.
A systemic approach to the study of human biology. The course will emphasize structure/function relationships and homestatic mechanisms. Three hour lecture and three hour lab. 4 Credits

BI-202 Principles of Ecology
LASC Categories: NLL, WAC
Prerequisites: BI-140, EN-102, MA-150 or MA-180, or MA-190, or MA-200.
Basic ecological theory relating to organism-environment interactions; population dynamics, and ecosystems. Three hours of lecture and a three-hour laboratory per week. Every year. 4 Credits

BI-203 Genetics
LASC Categories: NLL, QAC
Prerequisites: BI-141. Must have a minimum Accuplacer score of 3.
Introductory genetics with examples of human inheritance and recent developments in genetic engineering. Three hours of lecture and a three-hour laboratory per week. Spring only and every year. 4 Credits

BI-204 Microbiology
LASC Categories: NLL
Prerequisites: BI-141 and CH-121.
The cytology, metabolism, and genetics of bacteria. Immune responses and control of microorganisms are stressed. Three lectures and a three-hour laboratory per week. (Prerequisites: Introductory chemistry and biology courses) Fall and Spring and every year. 4 Credits

BI-205 Research Techniques and Experimental Design
Prerequisites: BI-141, and MA-150.
Investigations in experimental design and research methodologies required for the Honors program in Biology (or Biotechnology). Fall only and every year. 2 Credits

BI-206 Medical Microbiology
LASC Categories: NSP, LAB
Prerequisites: BI-161 and either CH-112 or CH-120 and CH-121.
A study of growth and control of pathogenic microorganisms with emphasis on infectious disease transmission, immune responses, prevention and treatment. Three lecture and three laboratory hours per week. 4 Credits

BI-207 Public Health Microbiology
Prerequisites: BI-161 and CH-112.
Growth and control of pathogenic microorganisms with emphasis on infectious disease transmission, immune responses, prevention and treatment for Public Health Majors. Every year. 3 Credits

BI-215 Neuroscience
LASC Categories: NLL
Prerequisites: BI-141 and BI-162
Structural and functional organization of the human nervous system with a focus on clinical applications. Three lecture hours and three laboratory hours per week. Every year. 4 Credits

BI-240 Research Experience
Lab and/or field based research on a specific research topic under the supervision of a faculty member. 1-6 Credits

BI-266 Biology of Aging
Considers characteristics of the aging process utilizing the newest theories based upon dynamics, function and metabolic regulations, disease and the acceleration of the aging process. [Formerly BI351.] Other or on demand. 3 Credits

BI-271 Basic Kinesiology
LASC Categories: NSP
Prerequisites: BI-161.
Structure and function of human skeletal muscles in relation to motion and general body mechanics under normal and stress conditions. Every year. 3 Credits

BI-301 Topics in Invertebrate Zoology
LASC Categories: NLL
Prerequisites: BI-140 and BI-202.
Considers anatomy, taxonomy (including selected articles of the international code of zoological nomenclature), natural history, and evolutionary relationships of selected invertebrate phyla. Three hours of lecture and a three-hour laboratory per week. Spring only and every 2-3 years. 4 Credits

BI-303 Parasitology
LASC Categories: NLL
Prerequisites: BI-140 and either BI-200 or BI-161 and BI-162.
Basic concepts in symbiology, life cycles, epidemiology, disease development, control and prevention of selected human parasites. Three hours of lecture and a three-hour laboratory per week. Every 2-3 years. 4 Credits

</tr>
</thead>
<tbody>
<tr>
<td>BI-304</td>
<td>Comparative Vertebrate Anatomy</td>
<td>NLL</td>
<td>BI-140 and either BI-200 or BI-161 and BI-162</td>
<td>Considers prochordate and chordate taxonomy and phylogeny; systematic morphological comparison of representative chordates to establish homology, analogy, and evolution. Three lecture hours and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-306</td>
<td>Developmental Biology</td>
<td>NLL</td>
<td>BI-141 and BI-203</td>
<td>Study of developmental patterns, cellular differentiation and cell interactions resulting in cellular diversity, organization, and perpetuation of the germ line. Three lecture hours and three laboratory hours per week. Fall and Spring and every year.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-313</td>
<td>Histology</td>
<td>NLL</td>
<td>BI-141 and either BI-200 or BI-161 and BI-162</td>
<td>The structure and function of animal tissues. Each student is required to prepare tissues using histological methods. Three hours of lecture and a three-hour laboratory per week. Spring only and every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-315</td>
<td>Comparative Neurobiology</td>
<td>NLL</td>
<td>BI-161 and BI-162 or BI-200 or PB-200.</td>
<td>Structural and functional organization of the central and peripheral nervous system. Principles of normal and abnormal transmission, integration, and storage of information in neuronal pathways. Three hours of lecture and a three-hour laboratory per week. Spring only and every year.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-321</td>
<td>Comparative Physiology</td>
<td>NLL</td>
<td>BI-140, BI-141, and either BI-200 or BI-161 and BI-162</td>
<td>A comparison of select physiological functions of different animal taxa with mammals used as a reference. Three lecture hours and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-324</td>
<td>Endocrinology</td>
<td>NLL</td>
<td>BI-140, BI-141, and BI-200 or BI-161/162</td>
<td>The role of endocrine glands in the normal integration of animals; mechanisms of hormone action, function, and interrelationships. Three hours of lecture and a three-hour laboratory per week. Spring only and every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-331</td>
<td>Marine Biology</td>
<td>NLL</td>
<td>BI-140 and BI-202</td>
<td>Considers the marine environment, its flora and fauna, distribution and production of plankton-nekton-benthos, zoogeography, bioeconomic factors and potential. Three lecture hours and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-333</td>
<td>Topics in Vertebrate Zoology</td>
<td>NLL</td>
<td>BI-140 and BI-202</td>
<td>Life histories, adaptations, distribution, systematics, and economic importance of selected vertebrates taxa. Each semester will focus on a particular taxon. Three hours of lecture and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-334</td>
<td>Wildlife Biology</td>
<td>NLL</td>
<td>BI-140 and BI-202</td>
<td>Theory and Practice of wildlife management. Considers procedures for collection and analysis of field and laboratory data on vertebrate game populations useful to wildlife biologists. Three hours of lecture and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-340</td>
<td>Plant Sciences</td>
<td>NLL</td>
<td>BI-140, BI-141, and BI-202.</td>
<td>Morphology, anatomy, physiology of flowering plants with studies on life cycles, ecological relationships, biochemical processes and evolution of plant diversity. Three lecture hours and three laboratory hours per week. Spring only and other or on demand.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-341</td>
<td>Mycology</td>
<td>NLL</td>
<td>BI-141 and BI-204.</td>
<td>The morphology, cytology, and evolution and classification of the fungi. Three hours of lecture and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-342</td>
<td>Plant Physiology</td>
<td>NLL</td>
<td>BI-141 and BI-204.</td>
<td>Fundamentals of plant processes: nutrition, metabolism, growth, development and responses. Three hours of lecture and a three-hour laboratory per week. Other or on demand.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-344</td>
<td>Soil Biology</td>
<td>NLL</td>
<td>BI-140, BI-141, BI-204, CH-120, and CH-121.</td>
<td>Includes study of nutrient cycling, relations between plants, animals, and microbes, ecology of polluted soils and soil biotechnology. Three lecture hours and three laboratory hours per week. Fall and Spring and every year.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-352</td>
<td>Symbiosis and Evolution</td>
<td>NLL</td>
<td>BI-140, BI-141, and BI-204.</td>
<td>Origin and nature of microbial life, evolution of multicellular organisms and the central role played by biological symbioses. Lecture and laboratory. Fall and Spring.</td>
<td>4 Credits</td>
<td></td>
</tr>
<tr>
<td>BI-360</td>
<td>Animal Behavior</td>
<td>NLL</td>
<td>BI-202 or PB-200.</td>
<td>Considers the marine environment, its flora and fauna, distribution and production of plankton-nekton-benthos, zoogeography, bioeconomic factors and potential. Three lecture hours and a three-hour laboratory per week. Every 2-3 years.</td>
<td>4 Credits</td>
<td></td>
</tr>
</tbody>
</table>
BI-371 Molecular Biology
LASC Categories: NLL
Prerequisites: BI-141 and BI-203, or BI/CH-410.
Emphasis on the molecular biology of the gene. Topics include structure, function, replication, transcription, recombination, mutability, repair and regulation of DNA. Three hours of lecture and a three-hour laboratory per week.
Every 2-3 years. 4 Credits

BI-372 Immunology
LASC Categories: NLL
Prerequisites: BI-141 and BI-204
Introduction to cellular defense mechanisms in health and disease; antigen-antibody reactions, human immune responses. Three lecture hours and three laboratory hours per week.
Spring only and every 2-3 years. 4 Credits

BI-375 Virology
LASC Categories: NLL
Prerequisites: BI-141, and BI-204.
Physical structure and replication schemes of viruses; role of viruses in human disease, research and commercial applications. Three lecture hours and three laboratory hours per week.
Fall and Spring and every year. 4 Credits

BI-380 Biodiversity and Conservation Biology
LASC Categories: LAB
Prerequisites: BI-140, BI-141, BI-202, and BI-203.
A theoretical and quantitative approach to species, genetic, ecosystem and community diversity in the context of modern conservation biology principles. Three lecture hours and three laboratory hours per week.
Other or on demand. 4 Credits

BI-398 Cancer Biology
Prerequisites: BI-141 and BI-203
Cellular and molecular basis of cancer, including cancer genetics, biochemical pathways related to cancer, and modern treatment approaches.
4 Credits

BI-399 Biochemical Regulatory Mechanisms
LASC Categories: NLL
Prerequisites: BI-141 and BI-203 or take BI-410 or CH-410
Examination of the many biochemical mechanisms that regulate gene expression and protein function, with an investigative lab project. Three lecture hours and three laboratory hours per week.
Other or on demand. 4 Credits

BI-401 Selected Topics: Biological Sciences
Each topic is a lecture and/or laboratory course in a selected area of the biological sciences presented by a departmental instructor and/or guest lecturers when appropriate. Topic to be announced in advance.
Other or on demand. 1-4 Credits

BI-402 Independent Study: Biology
Advanced semi-independent study (by qualified upper-level biology majors) of an approved biological problem. Faculty supervision required. (May not be used for major requirements.)
Fall only and every year. 1-6 Credits

BI-403 Internship: Biology
Intended for qualified, upper-level biology majors. Faculty advisor required. (May not be used for major requirements.)
Fall and Spring and other or on demand. 1-6 Credits

BI-404 Biology Seminar
LASC Categories: CAP
Prerequisites: BI-202, BI-203, BI-204, BI-200 or BI-161 BI-162. Senior Standing also required
Preparation and presentation of biological topics, chosen with the advice and consent of a faculty advisor.
Fall and Spring and every year. 2 Credits

BI-408 Directed Study: Biology
Directed study offers students, who because of unusual circumstances may be unable to register for a course when offered, the opportunity to complete an existing course with an established syllabus under the direction and with agreement from a faculty member.
1-3 Credits

BI-410 Biochemistry I
LASC Categories: NLL
The chemistry of proteins, nucleic acids, carbohydrates, and lipids; enzymes, biological oxidations; and correlations in intermediary metabolism. Three hours of lecture and a three-hour laboratory per week.
[Cross listed as CH410.]
Every 2-3 years. 4 Credits

BI-411 Biochemistry II
LASC Categories: NLL
The generation and storage of metabolic energy; biosynthesis of macromolecular precursors, DNA, RNA, and protein; and biochemical regulation. Three hours of lecture and a three-hour laboratory per week.
[Cross listed as CH411.]
Every 2-3 years. 4 Credits

BI-430 Field Biology
Study-Abroad Field Biology course for Biology majors. Course explores the intersection of human activities and environmental preservation, with an in-depth discussion of topics in organismal biology, ecology, biodiversity and biogeography.
Spring only and every year. 4 Credits

BI-440 Advanced Research Experience for Undergraduates
Advanced lab and/or field based research on a specific research topic under the supervision of a faculty member.
Fall and Spring. 1-6 Credits

BI-451 Nuclear Instrumentation I
Structure, functions, and interactions of particulate and non-particulate radiations with matter, detection, calibration, dosage, and statistical methods. Consent of NMT Coordinator. [Cross listed as PY 451.]
Every year. 4 Credits

BI-452 Nuclear Instrumentation II
Designed to further the skills of operating, calibrating and performing routine maintenance on scanners, gamma cameras, well counters, and liquid scintillation counters. Consent of NMT coordinator. [Cross listed as PY 452.]
Spring only and every year. 4 Credits

BI-453 Radiopharmaceuticals
Fundamental concepts of radiopharmaceutical production and use including basic radiochemistry. Consent of NMT coordinator. [Cross listed as PY 453.]
Spring only and every year. 4 Credits
BI-464 NMT Clinical Practicum IV
Upon completion of this practicum, students should be skilled in performing both routine and non-routine nuclear medicine examinations and laboratory procedures. Consent of NMT coordinator. [Formerly BI 456.]
Every year. 8 Credits

BI-466 Clinical NMT II
Case presentations using formulas, charts, tables, and calculations to arrive at examination parameters such as dose, number of counts, speed of instrument, etc. Consent of NMT instructor. [Cross listed as CH 466; formerly BI/CH 458.]
Every year. 4 Credits
