COMPUTER SCIENCE

Department of Computer Science

The Computer Science program offers an undergraduate education that promotes lifelong intellectual growth and prepares students for professional careers and advanced study. The program is grounded in the principles, theories, and application of the science of computing with a special emphasis in the areas of Big Data Analytics and Software Development.

Students will develop the ability to effectively apply discipline knowledge to solve real-world problems, adapt as the field changes, and make ethical decisions. The curriculum provides the foundations of team skills, and allows students to improve their interpersonal skills and professional attitudes. Students will have an opportunity to participate in an internship and in undergraduate research.

- Computer Science Major, Concentration in Big Data Analytics
- Computer Science Major, Concentration in Software Development
- Major in Computer Science
- Major in Computer Science, Concentration in Bioinformatics
- Minor in Computer Science

Faculty

Sarmad A. Al Aloussi, Assistant Professor (2017), B.Sc., M.Sc., Baghdad University; Ph.D., University of Banking and Financial Services, Computer Information Systems, Amman Jordan

Elena Braynova, Department Chair, Professor (2003), M.S. State University of New York Buffalo; M.S.,Ph.D. Moscow State University Russia

Aparna Mahadev, Professor (1999), B.Sc.,M.Sc. University of Madras India; M.S. Indian Institute of Technology India; Ph.D. University of Waterloo Canada

Hemant Pendharkar, Professor (2001), B.S.,M.S. University of Bombay India; M.S.,Ph.D. University of New Hampshire

Karl R. Wurst, Professor (1999), B.S. Central Connecticut State University; M.S.,Ph.D. University of Connecticut

CS-101 Basics of Computer Science
LASC Categories: QR
Prerequisites: Familiarity with basic computer operations. Math placement code of 3 or above
A survey course that provides a foundation in computer science by presenting a practical and realistic understanding of the field.
Fall and Spring. 3 Credits

CS-120 Microcomputer Applications
LASC Categories: QR
Prerequisites: Familiarity with basic computer operations. Math placement code of 3 or above
Learning state-of-the-art application packages including but not limited to word processing, file and database management systems and spreadsheets.
Fall and Spring. 3 Credits

CS-124 Health Informatics
LASC Categories: QR
Prerequisites: Familiarity with basic computer operations. Math placement code of 3 or above.
Use of computers and information systems in health care. Databases and spreadsheets. electronic health records. [Credit will not be awarded for both CS-120 and CS-124.]
Every year. 3 Credits

CS-135 Programming for Non-CS Majors
LASC Categories: QR
Prerequisites: Familiarity with basic computer operations. Math placement code of 3 or above.
Introfuction to programming. Emphasis on practial skills, working with data sets, doing analysis and visualization. No prior programming experience required.
Every year. 3 Credits

CS-140 Introduction to Programming
Prerequisites or Corequisite: CS-101
Introduction to fundamental structures and concepts of Computer Science including object-oriented programming; three lecture hours and one two-hour laboratory.
Every year. 4 Credits

CS-155 Computer Networking, Security and Databases
LASC Categories: QR
This course covers network protocols and the Internet; computer security fundamentals; basics of relational databases and SQL queries.
Every year. 3 Credits

CS-161 Web Design Using HTML
Introduces concepts needed for creation, design and implementation of effective web pages. Latest versions of mark-up language(s) will be used.
Every year. 3 Credits

CS-165 Digital Forensics
Prerequisites: CS-155
Digital forensics investigation; data acquisition; processing crime and incident scenes; multiple operating systems and file fomats; digital forensics tools, analysis and validation.
Every year. 3 Credits

CS-193 Special Topics in Computer Science for First Year Students
LASC Categories: FYS
Introductory level course covering topics of special interest to first year students. Offered only as a First Year Seminar.
3 Credits

CS-225 Discrete Structures I
Prerequisites: MA 180 or math placement code 6 or above.
Asymptotic notation, sequences, recursions and methods to solve them, proof techniques, relations, functions, sets and their basic properties.
Every year. 3 Credits

CS-242 Data Structures
LASC Categories: QAC
Prerequisites: CS-140.
Prerequisites or Corequisite: Pre-requisite or co-requisite of CS-225.
Introduces time complexity and covers fundamental data structures: lists, stacks, ques, search trees , dictionaries, priority ques, B-trees and inverted files.
Every year. 3 Credits

CS-248 Algorithm Analysis
Prerequisites or Corequisite: CS-295 as corequisite
Different algorithm design strategies, sorting, searching graph algorithms, parallel algorithms, algorithm complexity, turing machines, NP-hard and NP-complete problems.
Every year. 3 Credits

CS-254 Computer Organization and Architecture
LASC Categories: NLL
Prerequisites: CS-140 EN-102.
Corequisites: Pre-requisite or co-requisite of CS-295.
Combinational and sequential circuits, assembly language programming, digital computer architecture, instruction sets, addressing modes, memory hierarchies, I/O, and control circuits. Three lecture hours and two laboratory hours per week.
Every year. 4 Credits

CS-265 Database Applications
LASC Categories: QR
Prerequisites: Familiarity with basic computer operations. Math placement code of 3 or above.
This course introduces basic database concepts and teaches how to create a database; use SQL; and create database applications. [Formerly CS 125 Database Software]
Spring only and every 2-3 years. 3 Credits

CS-282 Unix Systems Programming
Prerequisites: CS-242
Problem soling and software design using C; introduction to UNIX programming utilities and text manipulation; low-level system programming in UNIX and C.
Every year. 3 Credits

CS-295 Discrete Structures II
Prerequisites: CS-225
Logic, basic counting techniques, probabilities, basic graph theory.
Every year. 3 Credits

CS-297 Selected Topics in Computer Science
Topics of mutual interest to students and faculty.
1-4 Credits

CS-335 Networking and Web Security
Prerequisites: CS-282
This course covers web and security problems, solutions, and techniques. Encryption, worms, viruses, firewall, safe practices, etc. are covered.
Every 2-3 years. 3 Credits

CS-343 Software Construction, Design and Architecture
Prerequisites: CS-242 EN-252
Software construction techniques and tools, software architectures and frameworks, design patterns, object-oriented design and programming. efficiency, reliability and maintainability of software.
Every year. 3 Credits

CS-348 Software Process Management
Prerequisites: CS-343 CM-110 UR-230
Project management including planning, progress measurement, estimation, and risk assessment. Functional and non-functional requirements. Software licenses, contracts and intellectual property.
Every year. 3 Credits

CS-353 Information Organization, Management, and Retrieval
Prerequisites: CS-155 CS-242.
Prerequisites or Corequisite: Pre-requisite or co-requisite of CS-373.
The course introduces fundamental concepts, standards, technologies and methods for information organization, storage, management, retrieval and recovery.
Every year. 3 Credits

CS-365 Client Server Computing Using the Internet
Prerequisites: CS-242
This course covers what client/server is and covers various client/server models and explores the Internet from a client/server perspective.
Every 2-3 years. 3 Credits

CS-373 Operating Systems
Prerequisites: CS-254 or CS-352, and CS-282 EN-252
Hardware and Software as an integrated system; development of system software for process management, resource allocation, memory management and I/O processing. [Formerly CS 385 Operating Systems]
Every year. 3 Credits

CS-383 Cloud, Parallel an Distributed Computing
Prerequisites: CS-373
The course introduces basics of Cloud Computing and fundamental computing technologies used for Big Data platforms such as Parallel, Distributed Computing.
Every year. 3 Credits

CS-405 Data Communications and Networking
Prerequisites: CS-373, EN-252 and CM-110.
Data transmission, encoding, interfacing, synchronization, data-link control, multiplexing, networking, circuit switching, packet switching, radio and satellite, local area networks, network access protocols.
Every 2-3 years. 3 Credits

CS-408 Directed Study: Computer Science
Directed study offers students, who because of unusual circumstances may be unable to register fro a course when offered, the opportunity to complete an existing course with an established syllabus under the direction and with agreement from a faculty member.
3 Credits

CS-443 Software Quality Assurance and Testing
Prerequisites: CS-242 and MA-150 or MA-302
Requirements analysis and test plan design. Testing strategies and techniques. Test coverage using statistical techniques. Code reviews and insepctions.
Every year. 3 Credits

CS-448 Software Development Capstone
LASC Categories: CAP
Prerequisites: CS-343 CS-373 CS-443
Prerequisites or Corequisite: CS-348 as prereq or coreq.
Development of a significant software system, following appropriate project and team management techniques. Requirements, design, implementation, quality assurance, professional, social and ethical issues.
Every year. 3 Credits

CS-453 Data Mining
Prerequisites: CS-242 MA-150 CM-110 UR-230
Topics include data warehousing and mediation techniques; data mining meathods: rule-based learning; decision trees, association rules and sequence mining.
Every year. 3 Credits

CS-471 Artificial Intelligence
Prerequisites: CS-371 CS-242 EN-252
Introduction to central issues of constructing intelligence systems. Examines historical and future trends of AI intelligence.
Every 2-3 years. 3 Credits

CS-472 Robotics
Prerequisites: CS-254 CS-282
Design and implementation of robotic systems, snesors and sensing, effectors, mechanics, control startegies and architectures, hardware and software issues.
Every 2-3 years. 3 Credits

CS-483 Big Data Analytics Capstone
LASC Categories: CAP
Prerequisites: CS-353 CS-453 CS-383
The course introduces methods and techniques used for Big Data analysis. The course discusses Analytics tools for a variety of data applications and includes a major team project.
Every year. 3 Credits

CS-497 Selected Topics: Computer Science
Prerequisites: CS-282
Selection of topics of mutual interest to student and faculty.
Other or on demand. 1-6 Credits

CS-498 Internship: Computer Science
Prerequisites: 21 credit hours in Computer Science courses including CS-282
Working in and for an organization where skills can be tested in real situations in order to gain experience, increase knowledge in various functional areas, and establish important contacts with an organization.
Every year. 3 Credits

CS-499 Independent Study: Computer Science
Prerequisites: 18 credit hours in Computer Science including CS-282.
An opportunity for advanced students to examine topics not normally taught in other mathematics or computer courses. Geared to the interests of both the student and the instructor.
Every year. 1-6 Credits
